

Workshop

The Kosli Automated Compliance Kickstart.

A structured two day workshop to plan your path to accelerated software delivery governance

You understand the value you can unlock with automated SDLC governance, but the prospect of implementation raises big questions about how to deliver a solution that works at scale. Our **two day workshop** is designed to give you clarity by

mapping your governance vision into an actionable plan. Working alongside your technical and business stakeholders, we'll assess your current state, define your ideal future, and build a roadmap that addresses your constraints, risks, and organizational dynamics.

Workshop Structure

DAY 1: DISCOVERY AND SCOPING

We begin by understanding where you are today and where you need to be. Through facilitated sessions, we'll explore:

- **Current State Assessment:** Your key governance challenges, pain points, and the business consequences of maintaining the status quo
- **Future State Vision:** What success looks like for your organization - both the immediate milestones and long term transformation
- **Control Scoping:** Which platforms, patterns, and controls to prioritize for maximum impact with minimal disruption
- **Value Stream Mapping:** Identifying bottlenecks, handoffs, rework, and other opportunities for automation

DAY 2: PLANNING FOR SUCCESS

With a shared understanding of your goals, we shift to execution planning:

- **SDLC Review:** Deep dive into your current software delivery lifecycle, mapping controls and identifying integration points and dependencies
- **Risk Storming:** Collaborative identification of implementation risks - technical, organizational, and operational - with mitigation strategies for each
- **Success Metrics Gathering:** Guided discovery of how to measure progress and outcomes along the transformation journey
- **Leadership Alignment Plan:** A presentation-ready summary of goals, delivery approach, success metrics, and risk management that you can take directly to decision makers

Workshop

What You'll Receive

At the conclusion of the workshop, you'll have:

- **Implementation Roadmap:** A phased approach to rolling out automated governance controls, including timelines, dependencies, and resource requirements
- **Risk Register:** Documented risks with severity ratings and mitigation strategies
- **Success Metrics Framework:** Clear KPIs to measure progress and demonstrate value to stakeholders
- **Leadership Presentation:** Executive-ready materials outlining the business case, delivery plan, and expected outcomes

Who Should Attend?

This workshop works best with a cross-functional team including:

- DevOps/Platform Engineering leaders
- Security and compliance stakeholders
- Development team representatives
- Audit or GRC function members
- Executive sponsors or business owners

Benefits of the Kosli Automated Compliance Kickstart

This workshop is designed to address any uncertainties you might have around implementing automated governance at scale. You'll leave with confidence that your governance transformation is achievable, properly scoped, and supported across your organization.

After this workshop, you'll have a valuable strategic artifact for your software delivery governance journey. As you move forward, you'll hit the ground running with a plan that's already been validated by your team and your stakeholders.

Workshop Investment: Fully refundable upon project commencement
